NFCG National Foundation for
Corporate Governance

Faculty Development Program on Corporate Governance Issues

Perspective

Corporate governance is difficult to define – especially good governance in the era of globalization. The need for good corporate governance and effective corporate management includes a fair, efficient and transparent activities of companies to meet certain well defined targets, with a view to achieve long term strategic goal to satisfy shareholders, creditors and suppliers etc and it also means complying with the legal and regulatory requirements. Basic philosophy of corporate governance is to achieve business excellence and enhance shareholder-value, while keeping in view the need to balance the interests of all stakeholders. Corporate Governance enhances the reputation of a company and attracts the more investors. Given the expansion that the Indian economy has been a witness to; one has to acknowledge the contribution of the corporate sector. It is very important that fostering of sensitivity is part of the broader objective for inclusive growth. For a good Corporate Governance standard – investor confidence is a vital factor. While the Company Law takes care of the corporate governance structure, the listing requirement which incorporates SEBI’s guidelines would take care of the dynamic aspect of continued compliance. As a regulator, SEBI is keen to protect the integrity of the market and the interests of the investors. It, therefore, keeps a constant watch, through its surveillance mechanism, to spot and stop any unusual movement or activity. All Rules, Regulations, Guidelines, surveillance, inspections, investigations, are applied to deal with market manipulation and check players’ misconduct and enforce regulatory action against the manipulators.

Objective

This course will provide insights of corporate governance and help participants in understanding the role of the Regulator and the Judiciary in addition to the role of directors and companies. It is hoped that the participant gains from attending such this course and in turn lead to a wider spread of knowledge of the interaction between governance and strategy in creating competitive advantage and in the process make governance more effective.
